PROFESSIONAL SUMMARY

Full-Stack Engineer with 4+ years of total experience (1 year at Infosys, 3+ years of hands-on development at Thought Grains Solutions) building secure, scalable enterprise web applications end to end: REST APIs and microservices with Java 17 and Spring Boot, and component-driven UIs with React and Angular. Delivered 25+ production REST APIs, a **~40% improvement in API response time** and a **~35% improvement in database performance** through query tuning, indexing and JPA optimization. Experienced with payment-gateway integration (Razorpay), event-driven systems (Kafka, RabbitMQ), CI/CD (Jenkins, Docker) and Agile delivery for government and enterprise clients.

TECHNICAL SKILLS

Backend: Java 17 (also 11, 8), Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices, Hibernate/JPA, JWT, Bean Validation

Frontend: React (Hooks, Redux, Context API, Router), Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3

Databases: PostgreSQL, MySQL, Oracle, SQL, Indexing, Query and Execution-Plan Optimization

Messaging: Apache Kafka, RabbitMQ, Event-Driven and Asynchronous Processing

Testing & DevOps: JUnit, Mockito, Postman, Swagger/OpenAPI, Git, Maven, Jenkins, Docker, CI/CD, AWS EC2, IIS

Practices: OOP, SOLID, Design Patterns, Clean Architecture, Agile/Scrum, JIRA, AI-assisted development

PROFESSIONAL EXPERIENCE

Full Stack Developer — Thought Grains Solutions **May 2023 – Present**

Clients: Bangalore Development Authority (BDA), Siemens Enterprise Digital Solutions

- **Built 25+ production REST APIs** with Java 17, Spring Boot and Hibernate/JPA, using DTOs, Bean Validation, pagination, sorting and global exception handling.
- **Improved performance:** cut API response time by ~40% and database performance by ~35% by analysing execution plans, adding indexes, rewriting joins and tuning JPA persistence on PostgreSQL, MySQL and Oracle.
- **Integrated Razorpay payments** with Axis Bank and HDFC for a government booking platform: order creation, hosted challans, webhook processing, HMAC signature verification, reconciliation and refunds.
- **Secured endpoints** with Spring Security, JWT, role-based authorization, BCrypt hashing and custom authentication filters.
- **Delivered full-stack features:** React and Angular modules integrated with Spring Boot APIs, authentication and business workflows, using component-based design and state management.
- **Owned modules end to end** from requirements analysis and design to testing, CI/CD and root-cause analysis, working with stakeholders in Agile teams (JUnit, Mockito, Jenkins, Docker, IIS).

System Engineer (Training) — Infosys **2022 – 2023**

- Completed Infosys's technical training program in Java and SQL, covering programming fundamentals, object-oriented design and relational database basics.
- Earned Business English certificates, Levels 1–5 (Learnship), Oct 2022.

SELECTED PROJECTS

BookMyFlat — Government Property Booking Platform

Java 17, Spring Boot, Spring Security, JPA, React/Angular, PostgreSQL/MySQL, Razorpay, Docker, Jenkins

- Developed backend services and UI modules for booking, onboarding, payments, refunds, allotments, challans, receipts, NOCs and notifications.
- Surfaced real-time payment and transaction status in the UI through webhook handling and reconciliation, and resolved payment, authentication and database issues using logs and root-cause analysis.

Enterprise Digital Solutions — Microservices Platform

Java, Spring Boot, JPA, Angular, SQL, Spring Security, Kafka, RabbitMQ

- Developed Spring Boot microservices with clear service boundaries and REST-based service-to-service communication.
- Implemented event-driven, asynchronous background processing with Apache Kafka and RabbitMQ.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering **2022**

Vivekananda College of Engineering and Technology, VTU | CGPA: 8.15

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi **Notice Period:** 30 days **Location:** Karnataka, India (open to Bengaluru / Mangaluru)
